

# Equine Veterinary Services

Equine Veterinary Services would like to advise all our valued customers that it is now possible to vaccinate horses against the deadly Hendra Virus

## Why vaccinate your horses against Hendra Virus?

- The number of confirmed cases of Hendra virus has **risen** dramatically in recent years.
- The Darling Downs falls within the officially designated '**higher risk**' area .
- Should your horse contract Hendra virus it **will** die or be euthanased.
- Hendra virus can be transmitted to humans with a **60% fatality rate**, protect yourself, your family and your staff now,
- Please help to **protect your veterinarians** against this deadly disease,
- All infected properties are automatically placed under **quarantine**. Could your business survive a lock down for several months?
- You have an obligation under Work Place Health and Safety legislation to **provide a safe working environment** for any staff you employ. In time ,you may risk legal action being taken against you if you don't vaccinate your horses.

LETHAL  
VIRUS  
NEW  
VACCINE

**The risk of infection remains low, but the consequences of not vaccinating could be extremely high. Protect yourself, don't delay, vaccinate your horses today**
